

## About MadeGlobal

Amazon, Dell and Ebay use online marketing to create huge profits, but most small businesses and entrepreneurs do not...

Made Global offers the tools to allow all businesses to compete.

MadeGlobal Limited is developing online marketing tools for small businesses and solo entrepreneurs. We are developing automated emails and in-email-marketing for these businesses to enable similar campaigns to those by Ebay, Dell, Tesco and Amazon.

In June 2006, Mintel showed research that the online retail sector still only amounts to 2% of the total market, but that the sector will grow 186% within the next 5 years.

Large businesses are already taking massive advantage of online marketing and email tools to reach their customers, but it is notoriously difficult for small businesses to do the same. Small businesses are really missing out!
