

## AdvertSolutions new customers

Our advertising tool for users of e-commerce shopping carts - AdvertSolutions.com - is now rolled out and in use by a quickly growing user base.

This tool enables users to have automatically generated adverts to put into their emails, website and other online sources. The adverts are always up-to-date with their shopping carts.

The adverts can also be put into the welcome messages of shopping carts such as Zen Cart and also osCommerce.

Development continues on this product at a fast rate and it is looking to be a huge success for the opensource shopping cart community.
