

## Wordpress Better Protected Password Pages

Check out our new, really useful plugin which makes password protected pages on Wordpress much better.

- Adds a re-lock button so that you can protect a page again
- Allows you to change all the password protected pages wording from the plugin
- Adds a great little background image, which you can customize, for the password area
- Full CSS to let you match the page to your template easily
- Improve password pages in wordpress 2.7 and 2.8
